

Year 4 News

As a follow on from the last newsletter, in Science Year 4 have to present the information that they have researched on their endangered animal in a multimodal format. 4NOS and 4MIL have decided to make a non-fiction book on The Julia Creek Dunnart. Our book has chapters written about the following information:

1. Description
2. Habitat
3. Diet
4. Life Cycle
5. Things that assist the survival of the Dunnart
6. Things that threaten the survival of the Dunnart
7. Human Action plans to save the Dunnart
8. A Concept Map

Each chapter has annotated diagrams that match the information presented in the book. Below are some examples of our finished product.
